

# TA Wind Speed Calculator (TAWSC) v1.02

Type: TA Program

Created by: AndrewAce3158

Memory: 16MB

File Size: 1.36MB

## **--General**

This is a simple program that converts the wind generator output into the TA wind speed (eg. 21 = 3500) so that you know how much the generators are going to produce when you set the wind speed for a map.

After installation TAWSC will be added into the Add/Remove Programs section in Control Panel.

## **--Tools Used**

- Visual Basic 5.0 - program creation
